

# 1,2,3 – WOW!

Abbiamo semplificato al massimo ogni passaggio di progettazione con la soluzione di stampa Beyond CMYK e la stampante di produzione Xerox® Iridesse®:

## 1 Esaminare la Guida alla progettazione

Scoprite come inserire nobilitazioni digitali – create con colori metallizzati, Rosa fluorescente, Bianco e/o Trasparente – in qualsiasi progetto.

## 2 Registrarsi alla formazione virtuale GRATUITA

Parlate con esperti e scoprite in che modo aggiungono la gamma Beyond CMYK alle app Adobe Creative Cloud, passo dopo passo.

[bit.ly/XeroxDesignerTraining](https://bit.ly/XeroxDesignerTraining)

## 3 Trovare un partner di stampa

Utilizzate lo strumento Global Locator per trovare un partner di stampa Beyond CMYK vicino a voi.

## Maggiori informazioni?

L'estensione della gamma di colori nella stampante automatica con il Rosa fluorescente – o FPink – semplifica enormemente il processo di corrispondenza dei colori PANTONE® e di altri colori aziendali chiave nei lavori digitali.

Questo campionario vi permetterà di muovere i primi passi.

**Preparatevi a trarre vantaggio da una nuova palette di possibilità...**

## Indice generale

- Pagina 43 Viola PANTONE®
- Pagina 49 Neutri PANTONE®

# Rendiamo semplice riprodurre in modo perfetto i colori aziendali.

La nostra estensione della gamma di colori nella stampante automatica consente di applicare un arcobaleno di colori PANTONE® con una precisione stupefacente. Questa guida presenta il meglio del meglio.

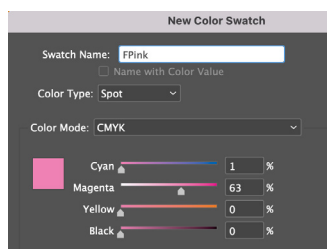

## Lasciate che sia la stampante a fare tutto il lavoro!

Dopo aver caricato FPink e avere abilitato la modalità CMYK+, l'estensione della gamma di colori nella stampante\* valuta automaticamente i colori spot PANTONE® nel file e quindi applica il canale FPink gestito dal colore per stampare la corrispondenza perfetta. Purché i colori PANTONE® siano impostati su "spot", l'operatore non deve fare altro che caricare FPink e avviare la funzione estensione della gamma di colori: la stampante penserà a fare tutto il resto!

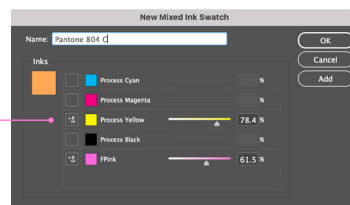

## Oppure potete farlo voi in Adobe® InDesign.

Avete FPink, ma non la funzione estensione della gamma di colori nella stampante automatica? Creare i vostri campioni PANTONE® utilizzando la palette di campioni Adobe® InDesign® è un'alternativa eccezionale per poter usufruire dei vantaggi di FPink.

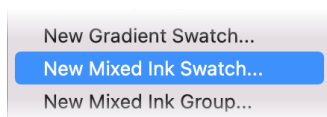

- 1 Creare un colore spot Rosa fluorescente come mostrato in basso e denominarlo "FPink":

- 3 Individuare il mix di colori sotto il proprio campione di stampa preferito. Immettere i valori per CMYK e FPink per creare il campione di toner misto Rosa fluorescente.

- 2 Andare a **New Mixed Ink Swatch** (Nuovo campione di toner misto) nella propria palette dei campioni.

\*L'estensione della gamma di colori nella stampante automatica è disponibile sulle stampanti di produzione Iridesse dotate di server di stampa Xerox® EX-P 6 (v4.0).

## Neutri PANTONE®

# Effetto “wow” ancora maggiore!

Oltre a produrre grafici, illustrazioni ed elementi tipografici di alto livello, i campioni illustrati in questa guida possono essere combinati per creare sfumature ultra-esclusive. Ecco alcuni esempi per stimolare la vostra creatività:

**PANTONE 2015:** C0 M3,92 Y29,80 K0  
FP20,78

**PANTONE 3596:** C0 M12,55 Y41,96 K7,06  
FP11,37

**PANTONE 712:** C0 M3,92 Y37,25 K0  
FP27,45

**PANTONE 7514:** C0 M18,04 Y36,86 K12,16  
FP20,78

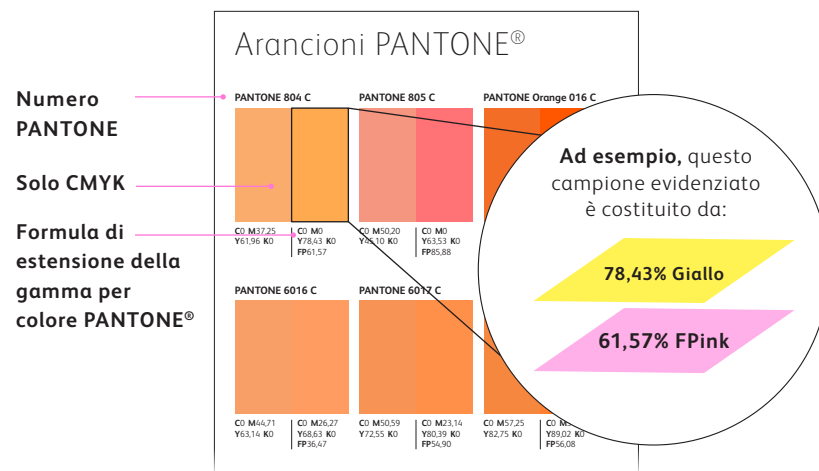

**PANTONE 7507:** C0 M0 Y36,08 K0  
FP23,53

**PANTONE 7513:** C0 M7,84 Y20,78 K8,24  
FP20,78

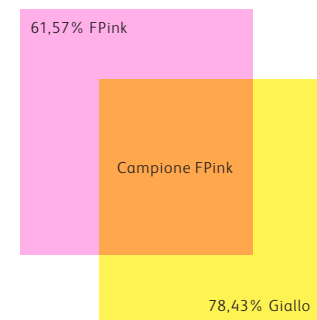

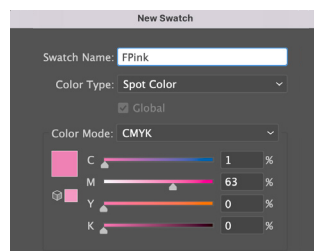

## Fatelo da soli in Adobe® Illustrator:

Illustrator non supporta i campioni di toner misti, pertanto i colori miscelati devono essere creati manualmente moltiplicando due strati. Questo campionario fornisce le miscele esatte necessarie. Ogni pagina di campioni segue lo stesso layout:

## Per creare colori miscelati in Illustrator:

- 1 Creare un colore spot Rosa fluorescente come mostrato in basso e denominarlo “FPink”:
- 2 Individuare il campione preferito. Ricrearne l'aspetto moltiplicando le sue tonalità C, M e/o Y su una base di FPink:

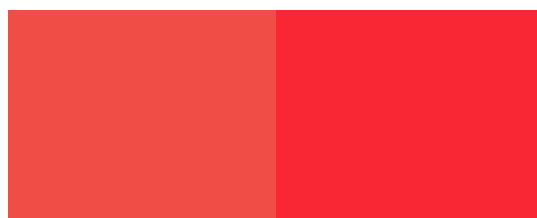

**Stampatelo da soli:** Per illustrare i vantaggi dell'estensione della gamma di colori nella stampante automatica, stampare questo campionario su una stampante di produzione Iridesse con server di stampa EX-P 6 v4.0 o versione successiva.

# Riprodurre i colori dei grandi marchi.

Estensione della gamma di colori significa poter riprodurre alcuni dei colori più famosi al mondo!
