# Enhanced visibility and better decision-making across your network of devices

Businesses run on networked assets. However, with a steady rise in cyber threats and the need for faster, more effective decision making, managing these assets is critical. From remote locations, to homeworkers and corporate offices, understanding exactly what print, scan and fax devices are on your network has never been more important. And now it's easier than ever to manage and gain insight into all of your assets from one place — even the ones that aren't under your Managed Print Services (MPS) contract.

DID YOU KNOW?

According to Xerox data, roughly 40% of devices are unmanaged.

MPS ASSET MANAGEMENT KEY BENEFITS AND FEATURES

Enables fact based decision making so you can:

- **Gain a complete picture** of global assets including homeworkers

- **Centralize change management** including MACD, account/asset connectivity support, pre-billing and transition management

- **Improve data accuracy** through timely asset data reporting and MPS Advanced Analytics

- **Reduce costs** by understanding asset data to drive fleet efficiency

- **Minimize risk** of asset and data loss, security vulnerabilities and lack of regulatory compliance

- **Improve sustainability** through an environmentally responsible asset disposal process

COMPREHENSIVE ASSET MANAGEMENT INSIGHTS

In addition to break-fix and supplies management, asset management has always been a core component of MPS. Now we're taking it even further by extending the asset management component to devices that aren't currently under contract. This makes it simpler to manage the lifecycle of your printers, scanners and fax machines, even the ones you didn't know you had.

Xerox® MPS Asset Management Service brings visibility to data in an intuitive, cloud-based dashboard. Whether devices are Xerox or non-Xerox, managed or unmanaged, even those serviced by another vendor – you see it all in one place.

Data visualizations provide the actionable insights needed to stay informed and be responsive. You can even filter assets by capability or service entitlement and view lifecycle information to support inventory audits. It's all about minimizing threats, managing risk and uncovering unknown factors to make better business decisions.

xerox™

Sound familiar?

More devices doesn't have to mean more problems. With total visibility in a consolidated view, MPS Asset Management takes the guesswork out of seeing and solving the most common asset management challenges, including security concerns and cost savings. And we can help you stay agile with optional custom services to meet your unique business needs.

CAPABILITIES SUPPORTED BY MPS ASSET MANAGEMENT

- Rightsize/Optimize Fleet Topology
- Manage Fleet Governance and Cost Control
- Improve User, Service and Operations Management Experience
- View Asset Metric Insights

HAVE YOU CONSIDERED THESE CHALLENGES AND RISKS WITHIN YOUR ORGANIZATION?

- ☐ I want to know where all of my printers are.
- ☐ I want to improve asset tracking at remote or indirect sites that have equipment that isn't being managed. I believe it's a significant number and they pose a risk.
- ☐ I want one place to audit my fleet and see details of all my non-managed assets.
- ☐ I have difficulty identifying and tracking devices that need firmware updates.
- ☐ I have trouble finding the data I need to locate devices that aren't meeting compliance requirements.
- ☐ I have remote regions with small device installations managed by a third party.
- ☐ I need global reporting on all devices, not just those under my MPS contract.
- ☐ I need the ability to provide basic, full visibility into my number of assets and asset types.
- ☐ I need to lower my costs by getting more value out of the portfolio of devices that I already have, including unmanaged assets.
- ☐ I have cost, compliance, security and sustainability concerns across my device portfolio.

We've been managing the lifecycle of print assets in organizations across the globe for over 30 years, and you can trust our pressure-tested set of award-winning tools and services to deliver.

Breakthrough Visibility, Next-Level Results
Flexible work trends. Changing print needs. Pending fleet refreshes. Bring it on. Imagine what you can do with the ability to analyze your entire fleet, reduce risk and improve security with a single tool. Learn more at **xerox.com/mpsasset**.
