Amhof Trucking, Inc.

More uptime and bandwidth to focus on core business needs.

"Now, with Xerox IT Services monitoring things, they know immediately when there is an issue and can resolve it without any downtime to our business. I sleep better at night because I don't have to worry about a server going down or a hard drive failing."

– Roger Amhof, Founder, Amhof Trucking. Inc.

ABOUT AMHOF TRUCKING, INC.

Headquartered in Eldrige, Iowa, Amhof Trucking began as a one-truck operation with focus on hauling grain. In the late 1970s and early 1980s, the company expanded into hauling agricultural equipment from manufacturers in Iowa, Illinois, and other Midwestern states. As this venture began to flourish, more tractors and trailers were added to keep up with the demand.

Over the years, Amhof Trucking has grown its fleet to 85 tractors and more than 250 trailers of various types to accommodate the varied demand of the customer base. These days, Amhof Trucking has earned the reputation as the only transportation company that can meet their special shipping needs.

CASE STUDY SNAPSHOT

THE CHALLENGE

- Desire to focus more on core business rather than troubleshooting computer and server issues and other IT needs on their own.

- Wanted to look for a trusted partner to manage and maintain their IT infrastructure.

THE SOLUTION

- After thorough analysis of existing IT infrastructure and processes, Xerox IT Services proposed a solution roadmap.

- Included consolidating individual servers into a virtual environment with new server hardware, nightly offsite backups, and setting up a new domain, with necessary permissions and directories.

THE RESULTS

- Xerox IT Services team is dedicated to managing Amhof Trucking's IT environment and resolving issues.

- The company is immediately alerted to any IT issues.

- Reduced business downtime and stress on management.

- Improved ability to focus on running and growing the business.
